Kitchen Adaptations

We adapted this home to allow the disabled client with back problems to prepare food without having to bend down or stretch into cupboards. We installed cupboards with drop down baskets, a mid-height oven, as well as worktops with clear space underneath for wheelchair access.

Kitchen Adaptations

This kitchen was fitted for an elderly client who couldn't access her cupboards due to her reduced mobility. But with her new draws she is able to access all her cooking and kitchen supplies.

After

Before

Ovens and Hobs

This Kitchen was adapted by installing a slide and slide oven at a more suitable height and the a new induction hob was installed to help prevent burns all aiding in our client regaining more of their independence.

Our kitchens are usually fitted with Altro non-slip flooring which come in a variety of colours for you to choose from. If the adaptations make a need for decoration, you will also be given a choice of coloured paint.

You will always be offered a choice of tiles and paint colours, however designs and sizes vary between our contractors. If you would like specific tiles that cost more than the tiles we specify, you are more than welcome to discuss with the chosen contractor and pay the difference.
